and the state of t	Comment. Major elements of the 38th Army AT Arty Brig stationed at the barracks installation on the east side of Leipziger Strasse had been at the Chrdruf troop training grounds since mid-August 1953. In September, the same source observed that the barracks installation	25X1
	involved only quartered an estimated 250 to 300 men.	
	The present report indicates that elements of the unit involved had returned to the Altenburg post prior to 19 October.	
2,	comment. The return of the 431 Army Arty Brig to its permanent station at the barracks installation on the west side of Leipniger	25X1
	Strasse was also observed by another source.	
	The unit is equipped with the type of gun observed at the Altenburg rail road station on 16 October. It is telieved that the tents had been erected in order to let them dry after they had been used during manneuvers.
